PO BOX 47
BANCROFT, IA 50517

EVENT: WEDNESDAY, JUNE 15, 2022
1PM START TIME

Hopefully by now your planters are put away for the year. Even though the planting season has concluded, now is not the time to put it away and off your mind. In fact, now is the time to start planning for a successful 2023 planting season. We would like to invite you to our first ever Planter and Sprayer Day at Deitering Bros., Inc in Bancroft, IA on June 15th, 2022.

We have recently added the New Holland, high clearance, self-propelled sprayer line (also known as the Miller Guardian sprayer). Here is your opportunity to get up close and personal with them. Sprayers make more trips across your fields than any other equipment on the farm. See how industry leading crop clearance and the ride quality of hydraulic suspension vs. air bags can make each pass as comfortable and efficient as possible.

In addition to our new sprayers, we offer the Ag Leader Right Spot nozzle by nozzle control system. Maintain constant pressure resulting in consistent application over varied speeds in addition to individual nozzle by nozzle section control as well as turn compensation to maintain even application as your boom turns. The Right Spot system can be outfitted on nearly any self-propelled or pull type sprayer.

Nothing has evolved more rapidly than the options that can go on a planter. From the trash whipper out front to the closing system in the back and everything in between, we represent the leading companies focused on putting your seed in the ground better than ever. We will be showcasing products from Ag Leader, Precision Planting and Yetter for upgrading your current planter. If you are considering a new planter, a Kinze 4905 high speed planter and an Agco/White planter powered by Precision Planting will both be on display.

While this day will be spent mainly on sprayers and planters, we will have a wide arrange of products on hand for you to see what is new. This includes Bobcat and New Holland skidloaders and attachments, New Holland tractors and combines with heads, Wil-Rich field cultivators, Landoll discs, Kinze high speed discs, Farm King augers, and Batco grain conveyors.

In addition, with the shortages we were seeing prior to this spring, we stocked up heavy on replacement planter and field cultivator parts. Rather than carry these parts in inventory until next spring, we have decided to offer a 10% discount on these parts June 15th and June 15th only. Please see the segment on this flier for a list of parts available and the requirements to qualify for the discount. Get your replacement parts now and work on your planter or field cultivator now while the weather is nice and put it away ready for next spring.

Finally, the 1st 100 people to arrive get a free entrance ticket and 1 free drink ticket to the North Iowa Ragin' Roosters baseball game to be played that night at the beautiful Bancroft Memorial Park. Game sponsored by Deitering Bros.

Don't forget - it's not what color you buy, it is who is there to support you when the ink is dry

WEDNESDAY, JUNE 15TH STARTING AT 1PM

check out www.deiteringbrothers.com for a schedule of events for the day

On display at our showcase there will be a 3-row unit toolbar with all the accessories for you to see each product that you may be interested in **INCLUDING:**
